Counterfeit Parts Policy Statement

Q-Tech Corporation is a high reliability hybrid crystal oscillator manufacturer and is acutely aware of issues of counterfeit parts and components that could affect the performance and reliability of its products. Q-Tech was the first to be registered as an oscillator manufacturer meeting the exacting requirements of AS9100:2004 as well as ISO 9001:2008. Q-Tech is also a qualified and leading supplier to MIL-PRF-55310 which is the US Military sanctioned QMS document governing oscillator products. Q-Tech Corporation also subscribes to and participates in the Government Data Exchange Program (GIDEP).

Q-Tech Corporation policy mandates the use of an approved supplier base (AVL) that is constantly monitored and reviewed. Every component purchased to be used in the production of our oscillator products is inspected and tested at Q-Tech in addition to our requirements for vendor inspection data and certification of compliance. When factory-direct purchasing is not available, we purchase only from franchised distributors. **Lot code and traceability are always mandatory.**

Q-Tech Corporation's products are designed and constructed for the rigors of the military, aerospace, down-hole and deep space markets. These markets require the highest reliability and performance. Q-Tech has always believed that one of the best ways to ensure the reliable performance of its products was to start with the highest quality and assurance levels of its supplier base to complement the skills and dedication of our experienced operators.
